EDUCATION

University Of Calicut — Malappuram, Kerala
Bachelor of Commerce, Specialized in Finance — *Jun. 2020 – May 2023*

EXPERIENCE

Flutter Developer — July 2023 – Present
self — *Ernakulam*

- Created a tailor-client interaction app using Flutter and Firebase, enabling authentication, real-time data storage, and an intuitive UI for uploading and browsing tailored designs.
- Developed a news app using Flutter with GetX for state management, integrating APIs for real-time updates, text-to-speech features, Lottie animations, and adaptive light/dark modes for enhanced usability.
- Built a weather app leveraging the BLoC pattern for state management and OpenWeather API, providing real-time forecasts with a clean, user-friendly interface.
- Developed a personal expense tracker app with Flutter, implementing Clean Architecture, GetX for state management, Hive for data persistence, and local notifications, ensuring a seamless and interactive user experience. Performing freelance projects with a focus on smooth UI transitions and user-centric design.

PROJECTS

Tailors Connect | *Flutter, Dart, Firebase*

- Developed a mobile app for tailoring services, utilizing Firebase for authentication, real-time data storage, and backend management.
- Created distinct user interfaces for tailors and customers, enabling profile creation, image uploads, and service browsing.
- Implemented secure login and real-time updates using Firebase Authentication and Firestore.

News App | *Flutter, GetX, HTTP, Lottie, Shimmer, Flutter TTS*

- Built a real-time news application with categories like trending, Apple, Tesla, and business.
- Utilized GetX for state management and integrated APIs to fetch and display news data seamlessly.
- Implemented text-to-speech functionality and smooth loading animations with Flutter TTS and Shimmer.
- Designed adaptive light and dark modes to align with the device's system settings.

Weather App | *Flutter, BLoC, OpenWeather API*

- Developed a weather forecasting app using the BLoC pattern for state management.
- Integrated OpenWeather API to fetch real-time weather data for multiple locations.
- Delivered a responsive and visually appealing interface for user convenience.

My Money | *Flutter, Hive, GetX*

- Developed a personal expense tracker application using Clean Architecture principles.
- Implemented state management using GetX for reactive and efficient data handling.
- Utilized Hive for local data persistence to ensure smooth offline functionality.
- Designed a user-friendly UI/UX and integrated local notifications to enhance usability.

Language Picker with Country Flag | *Flutter, Country Pickers, SVG*

- Designed and implemented a language picker feature with dynamic country flags.

Freelance Project and Flutter animations | *Flutter, GetX, Lottie, AnimatedBuilder*

- Built a settings page with interactive custom bottom sheets for user preferences.
- Integrated a star rating system using SVG files and a country picker for dynamic data selection.
- Implemented smooth and interactive animations in Flutter, including page transitions, button effects, and Lottie loading animations, optimizing performance for fluid user experiences across devices.

TECHNICAL SKILLS

Languages: Dart, HTML/CSS, JavaScript
Frameworks: Flutter, Firebase, GetX, BLoC, Lottie, Hive
Developer Tools: Git, Android Studio, VS Code, Postman, GitHub, Figma
Libraries: shimmer, country-pickers, flutter-tts, HTTP, provider
APIs: OpenWeather API, Pixabay API, REST APIs
